Note: Tighten all nuts & bolts with wrenches prior to use.

CARING FOR YOUR BENCH

MAKE YOUR INVESTMENT LAST

Cleaning

After each use, wipe your bench down with a clean, dry towel. If deeper cleaning is required, a damp towel and mild detergent should suffice. Avoid harsh chemical cleaning products, as they may damage the finish.

Re-tightening hardware

Periodically inspect the bench for signs of wear or loosening hardware. Make sure all nuts & bolts are tight. This bench is designed to support a good amount of weight and deliver reliable service over many years, but it will only do so when properly assembled and maintained.
