

CFF BATTLE ROPE

Care Instructions

THANK YOU!

Before you do battle with your new rope, thank you for buying from CFF. Do any of us really need instructions for rope? How's about we play it safe and mention a couple things to ensure you're doing battle with this rope for a good long time.

INCLUDED IN THIS DOCUMENT

- neverending battle (rope)

NEVERENDING BATTLE (ROPE)

ANCHOR & HOOK

Extend the life of your new rope by anchoring it during use and hanging it up when you're done with it. (You did get the anchor and hook to go with your new rope, didn't you?)

THOSE AREN'T HANDLES

The ends of your rope are heat shrink-wrapped to prevent the rope unravelling. We don't recommend hanging onto that wrapping as it can work its way off - and then your rope comes unravelled.

PLAY ROUGH, IN SMOOTH PLACES

Repeatedly slamming your rope against rough surfaces will accelerate wear and fraying. Keep an eye out for softer, smoother areas such as in the gym or on grass in the backyard.
